### **DETAILED ACTION**

# Claim Rejections - 35 USC § 112

1. Claims 1, 5, and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

2. Where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999). The term "coolanT1assage" in claim 1 is used by the claim to mean as best understood a coolant circulation circuit, while there is no known accepted meaning for "coolanT1assage". The specification only refers to this term in the Twelfth Embodiment fig 21 as being a coolant circulation circuit 2017. The term is indefinite because the specification does not clearly redefine the term or defines it with the claimed embodiment.

### Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical

Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting

Application/Control Number: 10/669,605

Art Unit: 3747

directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Takagi et al. US/6,857,398.

Takagi discloses a cooling system wherein an internal combustion engine cooling system comprising: a radiator (22) that receives cooling water from an internal combustion engine, cools the cooling water and returns cooled cooling water into the internal combustion engine; a coolant passage connecting the internal combustion engine and the radiator, and including an inlet passage through which the cooling water flows from the internal combustion engine into the radiator, and an outlet passage through which the cooling water flows from the radiator into the internal combustion engine; a bypass passage (25) connecting the inlet passage and the outlet passage to make the cooling water discharged from the internal combustion engine bypass the radiator; a flow control valve (26) placed at a junction of the outlet passage and the bypass passage to control radiator flow rate at which the cooling water flows through the radiator and bypass flow rate at which the cooling water flows through the bypass passage; a water pump (24) placed in the inlet or the outlet passage to circulate the cooling water through the internal combustion engine and the radiator; a desired coolant temperature setting means (35) for setting a normal desired coolant temperature of the cooling water flowing through the outlet passage; and a coolant temperature control means for

Application/Control Number: 10/669,605

Art Unit: 3747

controlling temperature of the cooling water flowing through the outlet passage on the basis of the desired coolant temperature set by the desired coolant temperature setting means, wherein the desired coolant temperature setting means changes the desired coolant temperature according to operating condition of the internal combustion engine (18, 19), traveling condition of a vehicle mounted with the internal combustion engine (51), and ambient condition (52). See figure 1 and claim 1.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

## Allowable Subject Matter

4. Claims 5 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arnold Castro whose telephone number is (571) 272-4839. The examiner can normally be reached on Mon, Tues, Wed, Thurs 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yuen Henry can be reached on (571)-272-4856. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
